TRAINING OFFERINGS

...and many more.

OVERVIEW

For every purpose-driven organization, the perpetual pursuit of better business outcomes comes with a need to invest in the continuous improvement of employee knowledge, skills and expertise.

By investing consciously in employee learning and development through training, mentoring and continuous coaching, organizations are able to ensure that their people are better equipped to contribute valuably to the development of key enterprise capabilities and strategic outcomes.

From our experience serving various organisations over the last nine years, we have come to realize that different specific motivations trigger the pursuit of employee professional development and certification - and we come ready with proven engagement models and resources and assure you that your learning needs can be effectively met by our team, in alignment with such specific learning needs and motivations.

WHO WE ARE

BNET Learning is a 21st Century Learning Platform built upon a passion to see individuals and organizations grow, excel and attain set goals while aligning knowledge and competencies with global standards and best practices.

We provide World Class training and are a consistent source of the relevant knowledge and expertise needed to thrive in a highly competitive global Human Capital market.

As a Learning and Development (L&D) Organization, we have a reputation for delivering quality instructor-led training as well as valuable mentoring.

Our classes are led by experienced, certified and expertly trained instructors. A combination of lectures, facilitated discussion, exercises, and practice tests contribute to a successful learning environment.

TRAINING

We have specialized training options for corporate clients. This allows BNET Learning to provide organizations the specific skills and knowledge needed by their employees to be successful, and by implication, facilitate the success of the company. Our goal at BNET is to develop the soft skills of your employees to aid their personal and career development growth plan.

The logo features a central blue circle with the text 'BUSINESS ANALYSIS' in white, bold, uppercase letters. This central circle is surrounded by several concentric, broken rings in shades of blue and grey, creating a dynamic, circular graphic effect.

BUSINESS ANALYSIS

Business Analysis is the practice of enabling and sustaining change in an organizational context, by defining needs and recommending solutions that deliver value to stakeholders and ensuring performance as well as compliance to relevant business policies.

- ❑ ***Business Analysis Certification Bootcamp (CBAP/CCBA);*** build the solid knowledge and understanding of the Business Analysis Body of Knowledge (BABOK™), and paves the way for individuals to advance on to Certification.
- ❑ ***Comprehensive Business Analysis Hands-On Program;*** practical course designed to teach and improve business analysis skills. The course enables new and existing business analysis professionals to go beyond basic theoretical concepts and certifications, and build credible, marketable and experiential skills.

Project Management is the application of knowledge, skills, tools and techniques to project activities to meet project requirements. It entails balancing a project's timeframe, budget and overall scope as the team works to meet its objectives.

- ❑ ***Project management Professional Certification Bootcamp;*** build the solid knowledge and understanding of the Project Management Body of Knowledge (PMBOK™), and paves the way for individuals to advance on to Certification.
- ❑ ***Comprehensive Project Management Hands-On Program;*** practical course designed to teach and improve project management skills. Learning how the "hands on" approach makes a better project manager. Learning by doing improves the learning process

Business Data Analytics is increasingly becoming an area of great attention for organizations and professionals. Organizations recognize it as a means by which they can obtain valuable insights from reporting; analysis and supporting more informed business decision-making

- ❑ ***Certification in Business Data Analytics (CBDA)***; recognizes a Business Analyst Practitioner's ability to effectively execute analysis related work in support of business analytics initiatives and is an indication of one's commitment, passion, and competency in performing business analysis on analytics initiatives.
- ❑ ***Data Analysis Fundamentals***; course provides you with an introduction to the essential skills required to enable you to collect, present and analyse data. Very quickly you will go from a beginner to a highly effective data analyst using Excel to present and evaluate business data. Delegates will work through practical case studies.

SCRUM is the most popular Agile framework. It is an adaptive, iterative, fast, flexible and effective methodology designed to deliver significant value quickly and throughout a project.

SCRUM ensures transparency in communication and creates an environment of collective accountability and continuous progress. The SCRUM framework, as defined SCRUM Body of Knowledge (SBOK™), is structured in such a way that it support product and service development in all types of industries and in any type of project, irrespective of its complexity.

- ❑ **SCRUM Product Owner;** represents the interests of the stakeholders in the Scrum Team. Commonly called ‘the voice of the customer’, the Product Owner is responsible for ensuring clear communication of product or service functionality requirements
- ❑ **SCRUM Master;** The Scrum Master is the team role responsible for ensuring the team lives agile values and principles and follows the processes and practices that the team agreed they would use.

Organizations need database management to run business operations, organize and track customers, inventory, and employees, store data of distinct types and automate processes.

This course provides the foundation you need for a career in database development or business intelligence. Database management allows organizations to manipulate and control data to meet necessary conditions throughout the data lifecycle.

The course is designed to teach database management concepts and skills, develop knowledge and skills for query formulation and database development and serve as a prerequisite background for other courses in the data architecture track.
